Position: Interior Architectural Designer

Full Time Position Scope & Responsibilities:

We are seeking a technically proficient and collaborative Interior Architect or Designer with 10+ years of experience with the ability to coordinate with interior design and architectural staff to interpret and manage the delivery of the interior Design intent through construction documentation and project specifications. Knowledge of and extensive experience with Interior Design and InteriorArchitecture projects, preferably in the senior living, hospitality and/or healthcare markets is required. Must have strong skill sets in producing documents through all phases of design including code compliance, interior detailing, millwork, ceiling plans, finish plans, schedules and project specifications. The ability to communicate and coordinate effectively with both architectural and engineering disciplines is a must. Must have the ability to manage and participate in multiple projects from a technical and production perspective, as well as interface with design staff proactively. Ability to develop and track detailed project schedules is a plus. Revit experience preferred but not a must. This position could include project management responsibilities with the potential to become the technical and documentation manager of the Interiors Studio

Qualifications:

10 years plus experience in Interior Architecture

Technical proficiency in document production, including code compliance and specifications, and construction administration

Proficient in Sketch-Up, AutoCAD, PowerPoint, and Revit a plus

Excellent verbal and written communication skills

Degree in Architecture and/or Interior Design
